

GREEN BOND TRANSPARENCY PLATFORM

The successful **transition** to a **green economy** is crucial for **Latin America and the Caribbean** to mitigate climate change and better hedge against increased climate risks.

This process will require substantial annual investments of between **USD 40-50 billion** in the region through **2030**.

Green bonds emerged as an **impactful vehicle** to finance climate-relevant investments, including renewable energy, energy and water efficiency, sustainable transport and land-use.

Transparency regarding the use of proceeds from green bonds and their environmental impact is a core **differentiating element** to traditional bonds that is **valued by investors**.

Harmonized and consistent reporting is an important factor in the green bond market. Issuers of labelled green bonds need to adhere to the **Green Bond Principles** by the International Capital Markets Association and can decide to certify their issuances under the **Climate Bonds Standard**.

External reviewers assess the alignment of a green bond issuance with the principles and the **standard pre- and post-issuance**.

As the green bond market expands, **investors** are demanding greater **transparency and comparability** in evaluating such instruments.

Which type of green bond asset is better for my portfolio?

What is the environmental impact of my investments?

Between **2014** and **2019**, a total of **USD 12.6** billion was issued in Latin America and the Caribbean through **52** issuances. Nevertheless, of the issuances surveyed by Climate Bonds Initiative,

Since **2014**, the green bonds volume in Latin America and the Caribbean grew 18-fold to **USD 3.6 billion** in **2019**

2019

Actual needs

Actual financing needs are more than ten times larger than current green bond issuances

Green Bond Transparency Platform

The **Inter-American Development Bank** is developing the **Green Bond Transparency Platform** to support harmonization and standardization efforts on Latin America and the Caribbean green bond reporting. Its goals are to contribute to transparency, facilitate consistent reporting, help **attract new investors** to the region and provide an enhanced level of confidence to existing ones.

The Green Bond Transparency Platform enables issuers, external review service providers, investors and underwriters to publish, verify and retrieve data on environmental impact metrics and use of proceeds.

Green Bond Transparency Platform principles

Completeness Unrestricted open access to all labeled green bonds issued in Latin America and the Caribbean

Transparency Disclosure of the use of proceeds, impacts, and methodologies and standards used

Traceability Simplified and automated processes leveraging Distributed Ledger Technology to ensure reliability, security and traceability

Comparability Data filters to compare environmental performance and other characteristics of green bonds

Strategy

The Inter-American Development Bank develops the Platform with guidance of an **advisory consortium** consisting of standard and guideline setters, and external review providers, pilot issuers, underwriters, and investors.

The Inter-American Development Bank and Green Bonds

- **Largest multilateral lender** in Latin America and the Caribbean
- **60 years of experience** lending to the region
- **Convening power of networks of** public and private investors, financial institutions, regulatory bodies and authorities locally and globally
- Actively **promoting the** incipient **Green Bond Market** in the region since 2014
Supported **more than 20%** of total issuance volume in Latin America and the Caribbean by providing client support:
 - Structure private and public **placements**
 - Green bond **portfolios** and framework development
 - Support in the due diligence and quality review of external revision of frameworks
 - Support for the certification of bonds under the **Climate Bonds Standard**
 - Co-development of new climate bond methodologies
 - Collaboration with the Climate Bonds Initiative on **post-issuance reporting**
- **Convening power of networks of** public and private investors, financial institutions, regulatory bodies and authorities locally and globally
